OTP Hike for 11/12/03 (Replacement)

Temescal Peak Loop Hike

Distance: Up to 7.4 miles

Elev. Change: Up to 1200'

Coordinator: Jack Robinson

Hike will begin at Trippet Ranch. Use PCH or 101 to Topanga Canyon Blvd. Turn east on Entrada Road (between PCH and 101) and follow the signs to Topanga State Park.

The trail proceeds east from the parking lot and then shifts to the north. At Eagle Junction we take the right hand road (Backbone Trail) and continue past dry Eagle Spring to Hub Junction. At this point we take the Temescal Ridge Fire Road about .6 miles to the trail to the peak on the left. We can have lunch on the peak or later at Eagle Rock.

Return to Hub Junction and take the center road to the Eagle Rock portion of the loop. After lunch or whenever, continue on this trail to Eagle Junction. A right turn at this point will return you to Trippet Ranch via Musch Camp. You may want to continue on the road and return the way you came.

Refreshments will be under the big trees.
